Burlington

Burlington is pleased to present period bathroom appliances for your bathroom. We are totally committed to maintaining the authenticity of each piece - whilst using the most modern methods of manufacture and materials available today.

We believe that we manufacture the best period products available today.

Our products comply with all the current British and European standards - and in many cases exceed them!

\$3680.00

A beautiful traditional furniture solution to add classic style and sophisticated British elegance to your bathroom.

Our new free-standing round design cabinets feature open wide doors for easy access to ample storage space. Perfect for hiding away everyday bathroom necessities and keeping worktops free from clutter.

Five Layers of Paint

Our Burlington furniture pieces are prepared with five layers of primer featuring UV stabilisation to minimise colour fading from exposure to sunlight. The painted top coat is then applied for glorious depth of colour.

Burlington Classic Basins

Classic Basin with Invisible Overflow, Pedestal and Claremont Taps

Classic Basins

The name says it all - a classic upstand basin to fit all interiors.

This range is available with a traditional waste (W1 - page 30) or with the unique invisible overflow (W9 - page 30). Round and traditional rectangular shapes complete the range. On the invisible overflow basins you do not need a plug in the basin, because the waste is invisible.

Burlington also introduces the regal range of pedestals to suit the basins. This means an extra 6-7cm in height.

All Classic basins are coated with; **nanOGLAZE**
ceramic that stays cleaner

Our basins exceed the British BS 3402-1969 and European standards EN 31-1999. Whilst these standards allow for a tolerance of 1 mm / 100 mm we use a standard of 1 mm per 133 mm - so the basins you receive are far more consistent.

All our ceramic is fired at 1,200 degrees centigrade for a minimum of seventeen hours. Whilst this is more difficult to control the bowing of product - it does ensure that our products exceed the European water retention standard of 0.5%.

Every single Burlington WC pan is both water tested for flushing and air pressure tested for leaks. Whilst air pressure testing is unusual, by pumping air at 0.015MPa(0.15bar) into the pan for 30 seconds one can ensure that there are no leaks.

All basins and WC's are packaged in 2 ply corrugated boxes - ensuring a perfect product is delivered to your home.

Burlington® Edwardian Basins

The Edwardian style is the original design for the traditional style of sanitaryware. The angular basin shape with the prominent back upstand is a classic.

This basin should be used with the full floor standing pedestal or with the beautiful chrome floor basin stand. The generous tap ledge has two soap ledges with drainage channels into the bowl. An optional chromed towel rail is available - this attaches to the underside of the ceramic basin - providing a very functional towel rail.

Burlington Victorian Basins

The Victorian style lacks the upstand on the back of the Edwardian basin. This leads to a lighter, more elegant look. The angular basin shape is a classic.

The basin comes in one or two tap versions (2 tap version comes with a chain stay hole for use with a plug and chain waste) and should be used with the full floor standing pedestal, or with the beautiful chrome floor basin stand. The generous tap ledge has two soap ledges with drainage channels into the bowl.

Burlington Baths

**Looking for the new rock'n' roll?
It's in the bathroom.**

Roll top baths exude cool, luxury and style. There is something slightly indulgent but thoroughly deserved about sinking into a roll top bath and letting your cares dissolve with the bubbles. And at these terrific prices, this is a luxury you can afford.

Our roll tops are made from acrylic sheets sandwiched with a thick stone resin filling, making them reassuringly solid but surprisingly lightweight. This also gives them excellent thermal properties, keeping your water warmer for longer and the surface warm to the touch.

London Round Soaking Tub

Baths

All our Acrylic baths are made over 10mm thick with double sided acrylic - ensuring a long life and improved heat retention properties.

All our baths have adjustable legs (so you can even level your bath on an uneven floor) and concealed fixings (so that you can fix the leg into the floor, for complete stability).

We employ an independent Quality Assurance company to test every batch of products we manufacture, using Accepted Quality Level (AQL) MIL-STD-105E as our standard.

Burlington Tapware

All our taps are available with traditional screw-down valves or with quarter-turn valves. The taps work with both low and high pressure.

Claremont Mixer with high central indice with pop-up waste

Tapware

Claremont

All Claremont taps have a four spindle tap head with a ceramic indice in the centre.

Kensington

All Kensington Regent taps have a ceramic lever tap head with a ceramic indice in the centre.

Regent Tap Bases

Regent tap bases have been designed so that the spouts are 30mm higher off the bath/basin (and a further 30mm away from the wall in the case of Regent wall mounted taps) than their equivalent namesake. This creates an opulent feel and, in certain commercial applications, ensures compliance with some archaic building regulations!

WC's

In Europe the height of an average male has increased by approximately 15cm in the past 130 years (with the knee height increasing by an estimated 6cm).

Moulded Wooden Seat Bar Hinge & Soft Close Seats

Moulded with ash, eucalyptus, pine and water-resistant resin which is then veneered at high pressure resulting in an extremely strong moulded wood toilet seat. The mahogany seat is then flow-coated with a high gloss polyurethane coat while the oak seat is sprayed with a satin polyurethane coating.

All the attributes of a wooden seat, look, feel and individuality. The solid moulded wooden core means the seat cannot crack or split. Our white seat is made of carbamide, a hard-wearing hygienic modern material ideal for this purpose. All our seats are designed to compliment our WC's perfectly.

nanogLAZE

ceramic that stays cleaner

All WC's have NanoGlaze in the bowl. Nanoglaze is a coating that reduces microscopic pores in the ceramic surface - making the ceramic smoother - as a result less waste 'sticks' to the ceramic making cleaning far easier

All our WC's have box (not open) rims. Whilst this is more difficult to manufacture - it does ensure that the water from the flush is correctly spread on the pan internal - so that you don't have any 'dry areas' that don't get cleaned with each flush

All our WC's are fitted with water saving dual flush cistern fittings. They are factory set at 3 & 6 litres and can be adjusted to 2 1/2 & 4 1/2 litres if required. We have registered our design of the first traditional dual flush cistern fitting (push the ceramic lever down in the normal way for a 4 1/2 litre flush - and push it up for a 2 1/2 litre flush!)

Cleaver, Berkeley **\$105.00**

All our radiators except R11CHR have been designed to allow for the fitting of an electric summer heating kit. This means that you can have warm towels all year around!

All our mirrors are sealed with Gunther Seal-Kwik. This ensures that the mirrors don't succumb to 'Black-Edge' - the oxidation of the mirror's edge that occurs in the moist environment of the bathroom.

Electric Heating Kit - 150 Watts for Cleaver, Berkeley

The average person uses 150 litres of water a day...

That works out at about 94 litres per day for personal washing and flushing your toilet.

Using our Swiss technology in our taps & showers you can save up to 40% of water usage - without any real adverse effect to the pleasure of showering or bathing.

You can also save 50% of water by using our 3 litre flush rather than a 6 litre flush.

So you can save up to 40 litres a day per person by using the complete Burlington water saving devices. That is a saving of over 14,000 litres per person per year!

Water saving is becoming a part of our lives

Burlington is the first British Traditional Designed range available that enables water savings!

The clever part in the taps is called an aerator. We believe that the finest manufacturer of aerators is the Swiss manufacturer called Neoperl. So we only use Neoperl.

In the UK some homes have low water pressure and some have high water pressure.

We supply every tap with two Neoperl devices:

1. Flow straightener – this is for use with low water pressures
2. Aerator – this is for use with high water pressures

So you can set up your tap correctly every time!

Our taps are designed to deliver the following maximum flows of water, regardless of the incoming water pressure:

Basin taps	13 litres per minute
Bath tap	14 litres per minute
Bath shower mixer	22 litres per minute

...and all our WCs only require 4½ litres of water per flush, a saving of 25% on the British standard.

So you can have fabulous performance whilst limiting the damage to our planet.

Water flow

Water flow in a normal traditional tap

Low pressure water flow with a Burlington tap using a flow straightener

High pressure water flow with a Burlington tap using an aerator

The underside of a bath spout of a normal, traditional bath tap.

The underside of a Burlington bath tap with a Neoperl aerator

Installation Tips

1. All products must be inspected before installation. Bath Co is not liable for installation costs.
2. Before installing, ALWAYS read the accompanying installation notes.
3. Any wall to which a product is fixed must be of suitable construction to support that products weight.
4. To assist with future maintenance, it is strongly recommended that furniture and ceramics be fitted to a tiled surface (rather than butting tiles against an item).
5. The glaze used on Bath Cos ceramic products is tough and non-porous. However, it must not be put under undue stress which may cause crazing or other damage:
 - ~ Do not over-tighten the waste – hand-tighten only with the correct sealant and contoured waste
 - ~ Do not over-tighten tapware during installation
 - ~ Water temperature should not exceed 55°C
 - ~ Do not drop anything onto a glazed surface
6. To avoid damage, tapware and showers MUST have the appropriate inline filters, and water pressure should be no more than 500kPA.
7. To avoid deterioration, it is important that mirrors are kept dry of any moisture, especially along edges.
(Refer to instructions for the appropriate cleaning method.)
8. Cleaning products are to be used as per instructions. Use a moist soft cloth, micro fibre cloth or a diluted mild detergent. Never use products containing acids, bleach or caustic soda. Never use cleaners of a gritty, abrasive nature.
9. Ceramic products are fired in a kiln, then cooled – a process which causes shrinking. Therefore, items may not be perfectly square or flat. Each product is checked to ensure it meets strict tolerances before dispatch.
10. Toilet must be fitted to 100mm soil pipe.

Pricing

Price quoted in our price list are inclusive of GST. They are guideline prices only and subject to change.

Delivery

We aim to despatch all standard orders within five days of receipt of the order. Imported products, timber finishes, paint colours, and other non-standard items may be subject to a longer delivery date. We will keep you informed if this occurs.

Freight

Freight will be charged for orders under \$400.

Disclaimer

Small & Co retain the right to change products and specifications without notice. All measurements are in millimeters and are nominal only. We do not refund if you change your mind. If the goods are faulty, however, we will meet our obligations under the Consumer Guarantees Act.

Non Stock Items

Products made to order take longer to deliver.

Warranty

General Warranty Statement

Small & Company Limited (Small & Co) warrants that in the manufacture of its Bath Co products only high quality workmanship and materials have been used.

The following warranty applies to Bath Co products supplied to customers in New Zealand, for use in residential installations only. Subject to the warranty conditions, in addition to any other right or remedy that the purchaser may have under any relevant consumer protection legislation, Small & Co undertakes to either **repair or replace** (at its discretion) any Bath Co product if that product contains a **material defect** with either **materials or workmanship** which arose in the **course of manufacture**.

Residential Warranty

- In relation to the following products bathroom vanities, basins, tops, baths, toilets, showers, tapware a 5-year warranty applies from date of purchase.
- In relation to the following products shower hoses, shower heads, cartridges, mirrors, cistern fittings, wastes, toilet seats, electrical, face plates, washers, valves and shower seals a 1-year warranty applies from date of purchase.
- In relation to the following products in-wall cisterns (excluding items listed above) a 15-year warranty applies from date of purchase.

Commercial Warranty

In relation to any Bath Co products installed in a commercial situation a 12 month warranty applies from the date of purchase. Commercial situations are defined as public washrooms, public buildings, schools, sports centres, gymnasium, hospitals, motels, hotels and retirement villages.

Warranty Conditions

Small & Cos domestic/residential warranty and commercial warranty is subject to the following conditions:

1. Proof of purchase (such as invoice or receipt) must be provided by the initial purchaser. This warranty is not transferable.
2. All Bath Co installation instructions must have been strictly followed and the product must have been installed in accordance with the relevant New Zealand Building/Plumbing Codes by a certified building or plumbing practitioner (as appropriate for the product).
3. The product must not have been subject to excessive wear and tear. The warranty only covers normal use and typical wear and tear.
4. The product must not have been tampered with or repaired in any way other than in accordance with this warranty.
5. The product must not have been damaged by misuse, accident or neglect, including water damage, sunlight, excessive water temperature, humidity, direct lighting or other adverse environmental conditions.
6. Harsh detergents or abrasive cleaners must not have been used on the product and the product must be cleaned in accordance with the recommended cleaning methods.
7. All warranty covered repair work is to be performed by Small & Co but Small & Co shall not be responsible for the cost of removal or installation of the product.
8. Small & Co shall make the final determination on any issue or uncertainty regarding the application of this warranty.
9. If you acquired the Bath Co product in trade (or some other exception exists under the Consumer Guarantees Act 1993 (the Act)) then the Act shall not apply.

If the above conditions are not met, the warranty will be null and void.

Small & Co shall not be liable to the purchaser for any loss, damage (direct, indirect or consequential), cost or expense incurred by the purchaser (including, without limitation, any damage to other products and/or labour costs incurred in the installation, repair or replacement of the product) other than in accordance with the above warranty, under any relevant consumer protection legislation or as consented in writing by Small & Co in advance of the cost being incurred.
