INSTALLATION

To ensure that the tap works well under low water pressure, the cold water storage tank must be at least 2 meters above the installed position. The maximum static pressure is 10 bar, and operating water pressure is 5 bar. Where the operating water pressure above 5 bar, then a pressure reducing valve must be fitted

NOTES

Accessories not included. Drawing indicates the technical measurement only and is not a reflection of how the product will look. Sizes are nominal only. All drawings in millimeters. Drawings not to scale. November 2023.
