SPA SPACE BASIN TOP

- The Space basin is China. China tops are composed of ceramic materials fired at high temperature to form a non-porous body, having exposed surfaces coated with ceramic glaze fused to the body. This is used to form a number of bathroom fixtures such as toilets, bidets, and lavatory sinks. China sinks are susceptible to damage from heavy impact. Due to the firing process – china shrinks up to 10%. This means that every top is unique and will have small flaws including slight warping.
- The Space basin is a single bowl unit and is available in a 500mm width.
