

CUSTOM SHOWER LINER

3-SIDED SHOWER LINER ORDER FORM

vcbc

Date: _____

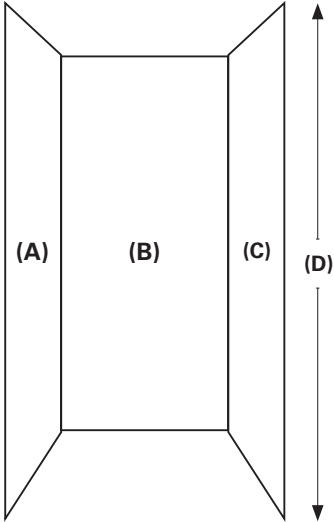

Order Number: _____

Merchant: _____

Consultant: _____

STEP 1.

Write the internal wall-to-wall measurement of your shower wall

The diagram shows a perspective view of a 3-sided shower tray. It has a rectangular back wall labeled (B). Two side walls, labeled (A) and (C), are attached to the back wall and extend outwards, tapering towards the front. A vertical dimension line on the right side, labeled (D), indicates the height of the tray. The front edge is open.

(A) Side Wall: _____ (mm)
(B) Back Wall: _____ (mm)
(C) Side Wall: _____ (mm)
(D) Height: _____ (mm)

NB. This order form only applies to 3-sided shower trays where Bath Co fits the upstands, and not pre-moulded upstand trays. All trays with pre-moulded upstands come with standard sized wall liners. Note: The internal measurement is on the outside measurement when folded, allowing for the thickness of the liner either end of the sheet. We then take off 5mm to allow for glue and movement.

Thank-you for the above order. Once we get this from you we can get the order through to the supplier. It will take approximately 5 business days before despatch. Please read the terms and conditions carefully, sign below and email to orders@smail.co.nz:

TERMS & CONDITIONS

1. The 3-sided liner cannot be ordered with our supplier until you ascertain the internal measurement from your builder and sign this form off.
2. When measuring the wall for the liner, it is the contractor's responsibility to ensure that the walls are plumb and the shower tray has been installed on a level surface. The top and bottom width measurement must be the same, as our supplier cannot make a tapered liner.
3. Most importantly, please note that once custom liners are ordered, they are non-returnable and no credits can be issued.

I have read and agree to the term & conditions. I agree the information provided above are correct specifications for this custom order.
